BIO 496: Molecular Basis of Disease

- How do changes in specific molecules affect cell function and human health?
- Why are some people more susceptible than others to certain diseases?
- How does understanding molecular biology lead to advances in medical treatment of disease?
- Interested in these types of questions? Register for BIO 496 (Molecular Basis of Disease)!

Course information:
- Fall 2008, MWF 8:00-8:50am, 3 credit hours
- CRN: 11590
- Prerequisite: BIO 215 with a grade of “C” or better
- Contact Dr. Kristen Walton for more information (201j Agenstein Hall, Ext. 5613, Email kwalton1@missouriwestern.edu)
